CAREER OBJECTIVE

Backend Developer with hands-on experience in building APIs for a variety of applications, ranging from management systems to real-time applications. During my training at the BRL, AKGEC, I actively contributed to team-based projects. I aim to enhance my skills in a dynamic environment.

EDUCATION

B.Tech, Information Technology

2023 - 2027

Ajay Kumar Garg Engineering College Ghaziabad

Senior Secondary (XII), CBSE

2023

Science

Chaudhary Chhabil Dass Public School Ghaziabad

Percentage: 80.00%

Secondary (X), CBSE

2021

Chaudhary Chhabil Dass Public School Ghaziabad

Percentage: 93.40%

TRAININGS / CERTIFICATIONS

Blockchain

Dec 2024 - Feb 2025

Blockchain Research Lab Ajay Kumar Garg Engineering College, Ghaziabad

Django Backend

Sep 2024 - Dec 2024

Blockchain Research Lab Ajay Kumar Garg Engineering College Ghaziabad, Ghaziabad

PORTFOLIO

PROJECTS

[Fund Me ↗](#)

Jan 2025 - Feb 2025

FundMe is a decentralized fundraising platform that enables users to create and manage fundraising campaigns on the blockchain. This project is built using the Foundry framework and provides an efficient way for individuals and organizations to raise funds in a secure and transparent manner.

[HuddleHub ↗](#)

Jun 2024 - Jan 2025

A backend project enabling seamless online meetings and real-time chat.

HuddleHub is a fast, secure, and scalable video conferencing application built primarily with a backend focus. It supports virtual meetings, online classes, and team collaboration with group and private chat functionality. Designed to ensure smooth communication and user management, HuddleHub keeps users connected—anytime, anywhere.

[Hotel Management system ↗](#)

Dec 2024

This is a backend-focused project designed to manage hotel room availability, user registrations, and bookings. Built with Django and Django REST Framework, the system handles authentication, room listings, booking management, and administrative controls—ensuring smooth and secure hotel operations through a RESTful API.

SKILLS

- HTML
- JavaScript
- Java
- Solidity
- Python
- Django
- Django Rest Framework
- CSS
- C Programming
- Amazon EC2

ADDITIONAL DETAILS

- Successfully completed backend development training at the Blockchain Research Lab (BRL), AKGEC, gaining practical experience in API development and collaborative project work.
